## 03 · Product Mockups

The winning mockup style — Comfort Colors garment-dyed tee in Blue Jean, happy Frenchie line-art, "Keep Waco Wagging" hand-lettered script. This same treatment can be applied across every breed and colorway for your Etsy photo slots.

**Flat-lay — Comfort Colors Blue Jean**

**On-model — Comfort Colors Blue Jean**

Etsy allows up to 10 photos per listing. Recommended set: main flat-lay → print close-up → on-model → 2–3 color options → size chart → personalization example → care card → brand card.

## 04 · Ready-to-Paste Etsy Listings

### Keep Waco Wagging — Ready-to-Paste Etsy Listings

**Family of designs:** Waco, TX (flagship) + 4-city line: Austin, Dallas, San Antonio, Houston. Same clean single-line skyline style across all five, each with its own alliterative dog-lover wordmark.

**How to use this doc:** Copy each block straight into Etsy. Titles are pre-optimized (front-load keywords, stay under Etsy's 140-char limit). Tags are 13 per listing (Etsy's max, each ≤20 chars). Fill in the bracketed `[]` bits (price, provider handling time). Photo order and variation setup are in the "Every Listing" section at the bottom.

## Every Listing — Shared Setup

### Photos (upload up to 10, in this order)

1. **Main:** Front mockup of the tee on your best-selling Comfort Colors color (e.g., Ivory or Blue Jean). If you offer personalization, show a filled-in example name — Etsy does NOT allow "your name here" placeholder text in the main photo.
2. Close-up / flat-lay of the print detail
3. The tee on a model or lifestyle shot (bonus: with a dog)
4. A second color option
5. A third color option
6. **Size chart** (chest width + body length by size) — this dramatically cuts returns
7. Personalization example ("Add your dog's name!") if enabled
8. Care instructions graphic
9. Fabric/quality callout (Comfort Colors 1717 badge)
10. Brand card / "Keep Waco Wagging" logo

### Variations

- **Color** — link each color to its own mockup photo (Etsy lets you attach a photo per color variation).
- **Size** — S, M, L, XL, 2XL, 3XL. Set price increases for 2XL/3XL to match Printify's upcharge so your margin holds.
- Set **"Prices vary by variation"** and pull the base cost from Printify, then apply your markup (aim for 2.2–2.5× cost, or a round retail like \$34.99 for standard sizes).

### Personalization (dog name)

- Toggle **Personalization = ON**, make it **Optional** (so non-personalized buyers still convert).
- Instruction text: `Enter your dog's name exactly as you'd like it printed (spelling is final). Leave blank for the standard design.`
- Character limit: 20.

**Pricing quick-reference (fill in your numbers)**

| Item                   | Printify cost         | Suggested retail |
|------------------------|-----------------------|------------------|
| Standard tee (S-XL)    | \$□                   | \$□              |
| 2XL                    | \$□                   | +\$2-3           |
| 3XL                    | \$□                   | +\$4-5           |
| Personalization add-on | \$0 labor (automated) | +\$3-5 optional  |

**SEO notes**

- Titles front-load the exact phrase people search ("Waco Texas shirt," "dog mom shirt," "Comfort Colors tee").
- Reuse the same 13 tags family-wide but swap the city-specific ones per listing.
- Add all 5 to a **"Texas City Dog Tees"** Etsy section so they cross-sell.

## 05 · Printify → Etsy Production Checklist

# Keep Waco Wagging — Printify → Etsy Production Checklist

Everything you need to take the 5 city designs from files to live, sellable Etsy listings with dog-name personalization. Work top to bottom; check each box as you go.

### Phase 0 — Prep your files (15 min)

- ☐ Confirm you have all transparent PNGs (already generated in this project):
- `waco\_skyline\_lineart\_B.png` (flagship)
- `austin\_skyline\_lineart.png`
- `dallas\_skyline\_lineart.png`
- `sanantonio\_skyline\_lineart.png`
- `houston\_skyline\_lineart.png`
- `breed\_frenchie\_lineart.png`, `breed\_dachshund\_lineart.png` (breed add-ons)
- ☐ **Upscale each to print spec** before uploading: transparent PNG, ~4500 × 5400 px, 300 DPI. The generated files are transparent but print best when upscaled to this size. Use any upscaler (e.g., an AI upscaler, Photoshop "Image Size" at 300 DPI, or a free tool like upscayl).
- ☐ Add the "**Keep [City] Wagging / Pup Culture / etc.**" **wordmark** into each design file if you want it printed on the tee (the skylines currently carry only the city script). Keep the wordmark inside the printable area.

**Tip:** Printify's print area for a tee front is typically ~12 × 16 in. Center the artwork in the top 1/3 for a classic chest placement, or full-front for the bold look.

### Phase 1 — Connect Printify to Etsy (10 min, one time)

- ☐ Create/confirm your **Etsy shop** is open (Etsy → Sell on Etsy → set shop name, currency USD, add a bank account + billing card). \*Note: opening a US shop has a one-time setup + per-listing fee.\*
- ☐ In **Printify**: top-right store dropdown → **Manage my stores** → **Add new store** → **Etsy** → **Connect** → authorize the pop-up.
- ☐ Back in Printify, confirm the Etsy store now shows as connected.

Reference: [Printify — How to sell on Etsy](#)

### Phase 2 — Build the Comfort Colors product in Printify (per design ~15 min)

Do this once for the flagship Waco tee, then duplicate for the other 4 cities.

- ☐ Printify → **Catalog** → search **Comfort Colors 1717** (garment-dyed heavyweight tee). Confirmed available on Printify.
- ☐ Choose the print provider — **SwiftPOD** is the recommended provider for CC 1717 (good quality + turnaround). Compare provider location/price and pick one.
- ☐ Click **Start designing**.
- ☐ **Upload** the design PNG → drag onto the **Front** → scale to your placement. Use the print-area guides; keep art inside the safe zone.
- ☐ Select the **colors** you'll offer (start with 4–6: e.g., Ivory, Blue Jean, Bay, Blue Spruce, Moss, White). More colors = more mockups to manage — start lean.

- ☐ Select **sizes**: S–3XL.
- ☐ Open **Mockups** → pick clean front mockups for each color (these become your Etsy photos). Generate/download them.
- ☐ Click **Save product** (don't publish yet — set up personalization first, next phase).
- ☐ **Duplicate** the product 4× and swap in each city PNG to make Austin / Dallas / San Antonio / Houston versions.

## Phase 3 — Set up dog-name personalization (per design ~10 min)

Printify supports two personalization modes. For **dog names, use AUTOMATED text** — buyer types the name on the Etsy listing, sees a live preview, and it auto-composites into the print file (near-zero labor per order). Use **MANUAL** (photo upload) only for photo tees.

- ☐ In the Printify product designer, add a **text layer** where the dog name should print (e.g., below the skyline).
- ☐ Convert it to a **personalization field**: enable "**Allow customers to personalize**" / add a **customizable text element**.
- ☐ Set the **font** to match the hand-lettered skyline script, set color, and lock position/size.
- ☐ Set a **character limit** (~20) and a **default/placeholder** so the mockup renders cleanly.
- ☐ Turn on "**Review each order before production**" so you can eyeball the name before it prints.
- ☐ Save.

Reference: [Printify — Personalization guide](#) (automated text vs. manual image modes)

If Printify's automated-text personalization isn't available for your chosen provider/blank, fall back to Etsy's native **Personalization** field (Phase 4) and manually add the name in Printify per order before approving production.

## Phase 4 — Publish to Etsy & finish the listing (per design ~15 min)

- ☐ In Printify, open the product → **Publish** → select your Etsy store. Printify pushes the title/description/mockups/variants as a **draft** to Etsy.
- ☐ Go to **Etsy** → **Shop Manager** → **Listings** → open the drafted listing.
- ☐ **Paste the polished title, description, and 13 tags** from `kww\_etsy\_listings.md` (overwrite Printify's auto-text).
- ☐ Confirm **photos**: reorder to the 10-photo sequence in the listings doc. Main photo must NOT contain placeholder personalization text — use a filled-in example name.
- ☐ Confirm **variations**: color (each linked to its mockup) + size. Set 2XL/3XL price bumps to cover Printify upcharges.
- ☐ Turn on Etsy **Personalization** (Optional) with the instruction: `"Enter your dog's name exactly as you'd like it printed (spelling is final). Leave blank for the standard design."`
- ☐ Set **price** (aim 2.2–2.5× Printify cost, or a clean \$34.99), **quantity**, **processing time** (match Printify's production + shipping estimate), and **shipping profile** (Printify handles rates — confirm it's set).
- ☐ Set **category** = T-shirts, **who made it** = "Another company or person" (Printify), **when** = made to order.
- ☐ **Publish** the listing.
- ☐ Repeat for all 5 cities.

Etsy references: [max 10 photos per listing](#) · [variations for color & size](#)

## Phase 5 — Order a proof & QA (do this before promoting)

- ☐ **Order a sample** of the flagship Waco tee to yourself (Printify offers discounted samples). Check: print sharpness, ALICO/skyline detail, color on the garment, placement, and wash test.
- ☐ Place a **test personalization order** to confirm the dog-name flows correctly from Etsy → Printify and renders in the right font/position.
- ☐ Fix placement/scale if needed and re-sync.

## Phase 6 — Order-fulfillment routine (daily, once live)

---

- ☐ Etsy order comes in → it appears in **Printify** → **My orders**.
  - ☐ For personalized orders: **review the dog name** (check spelling/caps), approve.
  - ☐ Confirm Printify **auto-charges your card** and sends to production. (Enable **auto-fulfillment** later once you trust the flow.)
  - ☐ Tracking syncs back to Etsy automatically → buyer notified.
  - ☐ Mark shipped is automatic; just monitor for any print-quality holds.
-
